### What happens at DSEi?

The UK government plans to invite human rights abusing regimes, such as Algeria, Bahrain, Colombia, Saudi Arabia and Vietnam, to the London arms fair to court them and sell them weapons.

The US and UK will seek the next generation of weapons for their wars, while the arms companies aim to set the agenda for more exorbitant military spending.

The arms fair brings together 28,000 international buyers and sellers. The deals that begin here fuel the arms trade the world over. Death, injury, fear and repression are exported from the arms companies on our doorstep.

**Open to all. Bring candles - with jars - a very windy area!**
